

Post-doctoral fellowship in Neurophysiotherapy
School of Rehabilitation
Tehran University of Medical Sciences

School of Rehabilitation offers four Post-doctoral positions for highly motivated and energetic persons with Ph.D. in physiotherapy. The study focus would be on the effects of interventions in neurophysiotherapy of subjects with **Stroke, Multiple Sclerosis, Spinal cord injury and Balance disorders.**

There are chances to study the effects of Robotic weight bearing systems such as LOKOMAT, LOKOIRAN and ERIGO on stroke, Multiple Sclerosis, Spinal cord injury and Balance disorders.

Interested applicants should have a background and prior experience in stroke, Multiple sclerosis and spinal cord injury assessments and rehabilitation, with related publications in international peer reviewed journals. The study would include collection, analysis, and interpretation of data in patients with stroke, Multiple Sclerosis, Spinal cord injury and Balance disorders.

Applicants should email a cover letter describing their interest along with their CV, recommendation letter from three references, and reprints of related publications to Research Deputy, Prof. Ansari at:

nakhostin@sina.tums.ac.ir.

Academic members of Neurophysiotherapy Research group:

Professor M.R.Hadian; hadianrs@sina.tums.ac.ir; hadianrasan@gmail.com

Professor N.N.Ansari; nakhostin@sina.tums.ac.ir.

Associate Professor S.Naghdi; naghdi@sina.tums.ac.ir
